

UX/UI Designer

Michelle Carrier

Objective

To be an influencer of top design and interface creation on applications and software. Continue learning in the web design arena by staying in the know about industry updates, standards, and best practices.

Experience

March 2020 – Now

Senior UX/UI IBM

Jumped on to the Smartbasket angular migration from PrimeNG to Bootstrap. Learned the basics of running an angular app and converting to bootstrap and UPS css standards.

Refactored a learning app with a docker file with a pipeline to deploy and use again. Also created a chatbot and integrated with the Consulting Academy.

My current project is the Consulting Academy redesign. I created a Github template and framework with documentation for other UI's to pull down and start creating over 100 modules with. I worked closely with the web component creator to open styles and refine the components. Pushed for us to use GitHub and have proper version control. Also, setup protocols for reviews and for QA on the modules.

August 2017 - December 2018

UX/UI Radolo

Building large and small scale apps for mobile and desktop use. Frontend design for the app layouts and frameworks. Update, Refactoring and redesigning older apps.

March 2012 - December 2017

UX/UI + Visual Design HitPath

Layout software interfaces for Hitpath and other apps. White label affiliate reporting interfaces for hundreds of clients. Create and maintain websites for our brands. Graphics for marketing and promotional needs ~ printed stickers, mugs, conference displays, event banners, and social media imagery.

Education

Sept 2003 - Dec 2007

B.A. Digital Media

University of Central
Florida

Skills

- Adobe Creative Suite
- HTML, CSS, Frontend Frameworks, CMS
- Github, terminal
- Docker, NodeJS, NPM, Gulp
- JS interactions and functions
- Jira and other agile apps

Interests

Sailing, Surfing, Spanish, Design, Architecture, Cultural Preservation
